CASE OF **SUCCESS**

izzi: agile and safe **operation in the cloud**

Currently izzi, Mexican company leader in Telecommunications provider of telephony, Internet and cable TV, use the AWS infrastructure for the implementation of the following services:

**Hosting of
cloud applications**

**Video and streaming
content distribution**

The trust that AWS gives izzi in the activation and operation of mission-critical services such as these is to meet its permanent connectivity and availability needs, which guarantees its agile and timely operation to offer the best service to their customers the 365 days of the year.

Likewise, Bestel, as an AWS certified channel, provides izzi with permanent connectivity to the cloud, through the Secure Fast Link service, which reduces latency and guarantees connectivity for the correct operation of business.
